

CECS 470 CSS Layout Design

ch07-proj1.css - highlighted additions and explanations

Highlighted rows show code added to complete the responsive Flexbox layout assignment. Unhighlighted rows came from the provided starter stylesheet.

Complete CSS stylesheet

#	CSS stylesheet
1	:root {
2	--color-primary: #ff6e40;
3	--color-back-light: #ECEFF1;
4	--color-back-dark: #37474f;
5	--spacer-base: 1em;
6	--card-font-size: 90%;
7	--header-font-size: 32px;
8	--header-height: 8em;
9	}
10	body {
11	font-family: Roboto, Arial, sans-serif;
12	font-size: 1em;

115	--header-height: 5em;
116	}
117	
118	.card {

#	CSS stylesheet
119	width: 45%;
120	}
121	}

What the added CSS does

Header Flexbox. The header becomes a flex container. **justify-content: space-between** sends CRM Admin left and the menu icon right. **align-items: center** centers both vertically.

Card Grid. The main container and cards section use Flexbox. Cards use **width: 24%** and **flex-wrap: wrap**, producing four cards per desktop row with even space between them.

Image Sizing. **max-width: 100%** keeps every book cover inside its card while the viewport changes size.

Hover Effects. Book covers become 150% saturated on hover. Cards gain a shadow. Buttons begin transparent, then fade to visible over one second when the card is hovered.

Responsive Media Queries. Below 480px, cards fill the row and the header shrinks. From 481px through 768px, cards use 45% width for two columns. Both sizes increase card text to 100%.
